

Samsung NP-N145-JP02US Fan Replacement

Fan replacement on a Samsung NP-N145-JP02US

Written By: Kiarah Quarles

INTRODUCTION

This guide will provide instructions on how to fully replace the battery on a Samsung N145 laptop. You will be given steps on how to detach the current fan on your device and attach a new one. You will want to perform this replacement if your current laptop fan is broken/damaged, or if the device begins to overheat.

TOOLS:

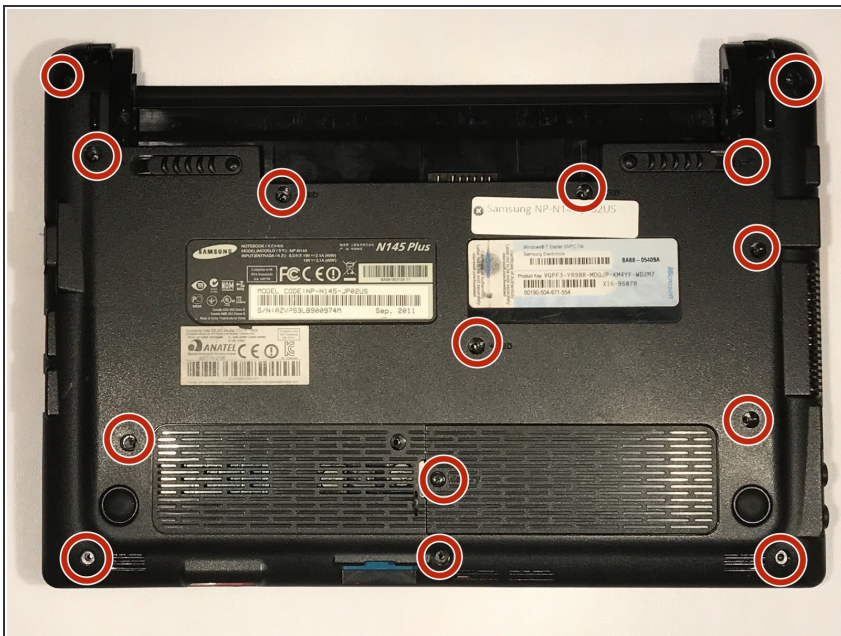

- [iFixit Opening Tools](#) (1)
 - [Phillips #0 Screwdriver](#) (1)
 - [Phillips #1 Screwdriver](#) (1)
-

Step 1 — Fan

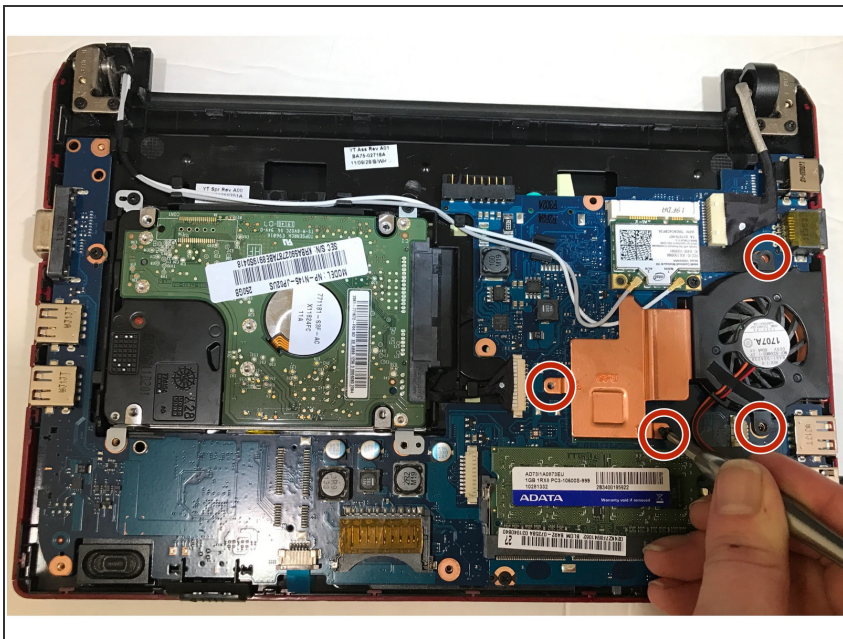

- ❗ Before starting the replacement, turn off the device sure and disconnect all cords.
- Close the device, lay it face down, and remove the battery.

Step 2

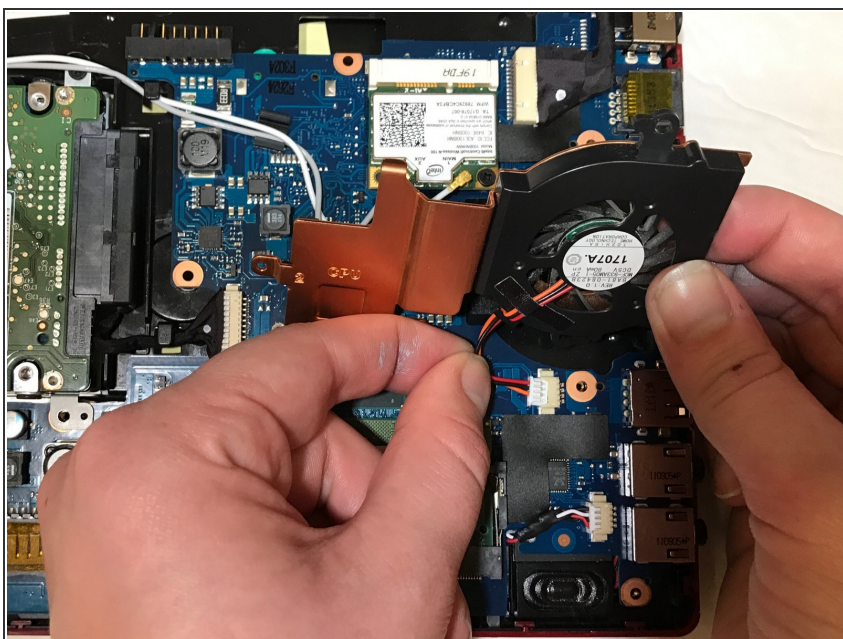

- Remove the back of the device from the main frame by unscrewing the 14 4.5 mm screws using a Phillips #0 screwdriver.
- Once all screws are out, pry open the back cover piece of the device using a plastic opening tool.

Step 3

- Remove the four 6.5 mm screws that surround the fan using the PH1 Phillips screwdriver head.

Step 4

- Manually remove the fan from the device by pulling out the connector.

To reassemble your device, follow these instructions in reverse order.
